DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1,2 and 8-12, drawn to switching a message that includes a header, classified in class 370, subclass 389.
 - II. Claims 13 and 15-23, drawn to power supply, classified in class 455, subclass 572.
2. Inventions I and II are directed to related processes and systems. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have materially different functions. More specifically, invention I is directed to arrangement for communication between mobile data handling units while invention II is directed to supplying power to/through the access point cables. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the

Art Unit: 2609

inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
